

# AgentK — Sovereign AI Agent Platform

## Quickstart

---

### \$29 — Lifetime Access

Welcome to AgentK — your sovereign AI agent platform.

#### WHAT YOU GET

- Compiled binary for Linux x86\_64
- Landing page UI (HTML/CSS)
- Docker setup (docker-compose.yml)
- AgentK Implementation Guide (comprehensive setup docs)
- 30 days email support

#### SYSTEM REQUIREMENTS

- Linux OS (Ubuntu 22.04+ recommended)
- Rust 1.75+ (for building from source)
- Ollama (for local LLM inference)
- Docker (optional, for containerized deployment)

#### 6 ORBITAL SECTORS

- Dashboard — Real-time agent status and metrics
- Cron — Scheduled task orchestration
- Journey — Multi-step agent workflows
- Command — Direct agent interaction
- Skills — Extensible capability modules
- Tools — Integration toolkit

#### QUICK START

1. DM [nodezero@agentmail.to](mailto:nodezero@agentmail.to) with your order number
2. Receive download links and onboarding instructions
3. Run: `./agentk` or `docker-compose up`
4. Open `http://localhost:8085` in browser

## ARCHITECTURE

AgentK runs entirely on your hardware. No cloud dependencies.  
All agent orchestration, data storage, and inference happen locally.

Support: [nodezero@agentmail.to](mailto:nodezero@agentmail.to)
