

# CSM Quantum-Safe API — Yearly Subscription Quickstart

---

**\$299/year — Best Value**

CSM Quantum-Safe Cryptography API — Yearly Quickstart Guide

YOUR SUBSCRIPTION IS ACTIVE

Your API key has been provisioned automatically.

API ENDPOINT: <https://tikkunolam.today>

YOUR API KEY: (check your email receipt)

WHAT YOU GET (YEARLY — BEST VALUE)

- 10,000 quantum-safe API calls per month, every month
- ML-KEM-768 + X25519 hybrid key exchange
- AES-256-GCM encryption
- 9-level Mandala security layers
- Audit logging
- Priority support
- Save \$49/year vs monthly pricing ( $\$29 \times 12 = \$348$  vs \$299)

QUICK START

1. Test your key:

```
curl -s https://tikkunolam.today/status
```

2. Encrypt your first message:

```
curl -s -X POST https://tikkunolam.today/encrypt -H "Content-Type: application/json" -H "x-api-key: YOUR_KEY" -d '{"plaintext":"Hello quantum-safe world!","key_type":"hybrid","label":"demo"}'
```

3. Decrypt (using the ciphertext from step 2)

## END-TO-END ENCRYPTION

Your data never leaves your control. The CSM API provides the quantum-safe algorithms;  
you hold the keys. No backdoors. No tracking.
